

I am commenting in regards to K-LOVE and the consideration of this national radio station being put on a Lower Power FM (LPFM) broadcast service. I have enjoyed the program that K-LOVE provides for almost three years now. I can always be confident that no matter what time of day or night that I turn on my radio I can find a radio station that is good for the whole family. This radio station brings an encouraging and uplifting message and music, and just not for me, but for others in my community. This radio station helps to bring unity, and God's love to many communities, just not mine. There are some places that the only way they can hear this music is on K-LOVE, they do not have any other radio station to turn to. So I believe that the service that K-LOVE provides benefits families, because the whole family can listen to it, the parents don't have to worry about content or cuss words, and when families benefit so do communities. Plus, it is an awesome blessing to go anywhere in this great country of ours and to be able to listen to the same radio station that I listen to at my home. Thank you for your time, and keep K-LOVE on the same broadcast service that it is currently on. Changing this service will only do more harm than good on a national level. Thanks again, God bless.
